**Subject:** Chapel Hill Police Station Coal Ash Update

Roger,

Falcon Engineering, the Town's environmental consultant, has completed resampling of the groundwater monitoring wells and has taken additional soil samples at the Chapel Hill Police Station. A copy of Falcon Engineering's findings is attached that you can share with the Mayor and Council. This work was done in response to guidance we received from NC DEQ in a letter dated October 23, 2015 and a follow-up letter dated February 11, 2016. A copy these letters and all previous reports and NC DEQ letters regarding the Police Station site can be found on the Town's [coal ash web page](#).

The February 11, 2016 letter from NC DEQ specifically recommended that the Town take additional soil samples in a section of the Police Station site where upcoming greenway construction will require soil excavation. Greenway construction has not yet begun on the Police Station site and we will await guidance from NC DEQ before doing any excavation on that section of the greenway project. As we have done previously, we will forward this report to NC DEQ and post it on the Town's coal ash web page.

Please contact me if you have any questions or need additional information.

Sincerely,

Lance

2020

CHAPEL HILL  
OUR TOWN. OUR VISION.

Help create a new Comprehensive Plan at [www.townofchapelhill.org/2020](http://www.townofchapelhill.org/2020).
